Reading

Read the following passage, then answer the questions:

"Creativity" is not just a collection of intellectual abilities. It is also a personality type, a way of thinking and living. Although creative people tend to be unconventional, they do share common traits. For example, creative thinkers are confident, independent and risk-taking. They are perceptive and have good intuition. They display flexible, original thinking. They dare to differ, make waves, challenge traditions and bend a few rules.

Creative people are typically at least above average in intelligence, but not necessarily extraordinarily so; other factors are as important as their IQ, especially the ability to visualise, imagine and make mental transformations. A creative person looks at one thing and sees modifications, new combinations or new applications. For example, a creative product developer for a sweet company, wandering through a supermarket’s fruit aisle, will visualise new sweet flavours, sizes, shapes and even audiences. Like all of us, creative people make mistakes, and they subject themselves to embarrassment and humiliation.

Wings

If I had wings
I would touch the fingertips of clouds
and glide on the wind’s breath.

If I had wings
I would taste a chunk of the sun,
as hot as peppered curry.

If I had wings
I would gaze at the people
Who cling to the earth.

If I had wings
I would breathe deep and sniff
The scent of raindrops.

If I had wings
I would dream of
swimming the deserts and walking the seas.
