Introducing GROW, PMAA Education Group's New Digital LMS!

PMAA has developed its own LMS platform, the most adopted LMS worldwide. **GROW** is a cloud-based platform, designed specifically for the K-12 market. It allows educators, students, teachers, parents, and school administration to access and interact with their curricula anytime, anywhere: on tablets, smartphones, and desktops, online or offline.

The name **GROW** highlights PMAA's learning philosophy:

Gather: Students explore and collect diverse learning materials, resources, and data available through our LMS. This stage builds a strong foundation of knowledge and supports inquiry based learning.

Reason: Learners critically analyze and process the information they've gathered, forming logical connections and gaining a deeper understanding of the subject matter.

Observe: Students actively notice patterns, reflect on their learning, and connect ideas to real-world contexts, enhancing comprehension and retention.

Win: By applying their learning, students expand their skills, confidence, and competencies, growing academically, socially, and personally.

Our LMS empowers educators to guide students through each GROW stage, ensuring a personalized, engaging, and effective learning journey.

Learn More About GROW, PMAA Education Group's New Digital LMS

What is an LMS?

An LMS is a Learning Management System that supports student learning through a digital platform.

Why use an LMS?

For students, recent research has shown the positive impact of digital learning materials on both engagement and performance, while also reducing teachers' workload. High-quality interactive content offers several advantages to learners – a more student centered approach since students develop more autonomy and take control of their learning pace.

For teachers, an LMS allows more time to focus on effective teaching by reducing the time spent grading assignments and managing paperwork.

What can it do?

For teachers, an LMS offers tools for course creation, classroom management, flipped learning, assessments, reports, and it allows you to communicate and interact with students, parents, and other teachers.

On GROW, you can have access not only to PMAA's standards-aligned educational products and interactive

content, but you can also create and upload your own content: videos, animations, audio, games, tests, quizzes, external links, texts, interactive images, and presentations. Your teaching materials and resources can be enhanced, increased, and made available to your students with just a few clicks.

What else can GROW offer?

How about having at your disposal the means to assess your students instantly, create tests using a question bank, assign homework or activities to all or different groups of students, and even send messages via chat or forum? That's right! All that is possible with GROW.

How can I access GROW?

You can access it via smartphones, desktop and laptop computers, and tablets using your internet access. Take advantage of GROW to help your students succeed! To find out more or access a free demo, contact PMAA at info@preissmurphy.com.

Blended learning is one of the newest and most innovative ways of reaching every student and meet their learning needs. PMAA Education Group supports this method by delivering content and instruction in both offline and online media to supplement our books and educational resources. PMAA provides a broad range of resources that complement and expand learning beyond the classroom by offering opportunities for students to learn and evaluate their own learning independently, through high quality, relevant, and engaging tools designed for busy teachers and parents.

At **PMAA Education Group**, we believe that core learning is the best form of learning and guarantees success. That is why all of the cutting-edge digital products that we develop are in line with the curriculum core skills of critical thinking, creativity, collaboration and communication.

Any device. Any platform. Any need. PMAA is digital.

Curriculum Development

At PMAA Education Group, we design, develop, and deliver comprehensive educational services that adapt to the evolving needs of learners, educators, and institutions worldwide.

Our curriculum development is built to connect schools, support teachers, and engage students, all through a seamless end-to-end educational solution.

We partner with ministries, other publishers, schools, and education leaders to co-create standards-aligned curricula that are:

Purpose-driven: Designed around international learning goals and global competencies

Flexible: Adaptable to diverse systems, learner profiles, and teaching models

Inclusive: Built for equity, accessibility, and cultural relevance

Integrated: Embedding 21st century skills, technology, and assessment from the start

Our curriculum packages cover every stage of learning from pre-school to higher education and are available in both print and digital formats.

Visit www.preissmurphy.com to view digital samples and learn more about our curriculum resources.

NGSS

Next Generation Science Standards

Science education has always been essential to help us make sense of the world's complexity and demands. Science knowledge is central to comprehend life facts, such as using technology, making healthcare choices, or even solving everyday professional problems.

The **Next Generation Science Standards (NGSS)** is focused on preparing students with the skills they need to succeed in their future professional and academic careers. With its three-dimensional approach, the NGSS emphasizes crosscutting concepts, engineering practices, and core ideas that apply not only to academic subjects but also to real-world problem-solving.

STEAM Education is an approach to learning that uses Science, Technology, Engineering, Arts, and Math concepts and practices to foster students' creativity, collaboration, communication, and critical thinking skills. In line with modern approaches, PMAA offers educational resources that provide STEAM content to develop students' skills and competencies necessary to achieve success in their future academic and professional careers.

International Consolidated Standards

approved 

The International Consolidated Standards (ICS), compiled and developed by a team of educational experts, were designed to serve the international community.

As a compilation of educational standards from several countries, the ICS standards establish the competences that students should acquire at each grade level.

PMAA Education Group curricula follow the ICS in science, math, and English to provide a set of skills, knowledge, and concepts that enable international students to transition smoothly to and from international schools.

INTERNATIONAL LITERACY ASSOCIATION

The International Literacy Association (ILA) is a professional organization dedicated to advancing literacy for all through advocacy, research, and professional development. Focus: It sets professional standards and provides guidance for effective literacy instruction and practice worldwide.

Role in **English and Me**: The curriculum aligns with ILA's standards, which cover areas such as phonological awareness, phonics, fluency, vocabulary, and comprehension, ensuring comprehensive literacy development.

The Science of Reading (SoR) is a vast body of research that encompasses decades of work across multiple fields, including cognitive psychology, neuroscience, and education. Focus: It is not a curriculum, but a scientific consensus on how people learn to read. It emphasizes that reading is an acquired skill that requires explicit, systematic instruction in phonemic awareness (the ability to manipulate sounds) and phonics (the relationship between letters and sounds). Role in **English and Me**: The curriculum's systematic and explicit phonics approach, which builds skills like phoneme-grapheme mapping and decoding, is directly based on the evidence-based principles of the Science of Reading.

Count on our guidance to help you succeed with the Common Core State Standards (CCSS).

The Common Core State Standards provide a well-structured framework for Kindergarten through 12th grade in Language Arts, Literacy, and Math to create a modern and effective approach to teaching and learning. They define grade-specific goals to guide the educational development of students for them to be successful in their academic careers and beyond.

Our experienced curriculum teams have developed curricula that has a strong alignment with the Common Core State Standards. For subject areas, like science and social studies, PMAA also focuses on providing standards-aligned materials by adopting State Standards from New York, California, New Mexico, and others — always reaffirming its commitment to offering teachers and students the most comprehensive, high-quality solutions, and resources.

Without a doubt, improving education through the Common Core State Standards requires a committed investment, not only in curriculum and technology, but also professional development and teacher development. Even the best books and resources in the world will not make an impact unless educators feel comfortable using them and that they connect and blend with their particular style of teaching.

NYS Next Generation LEARNING STANDARDS

Next Generation Learning Standards

Over one hundred educators and parents worked together to make recommendations and revise the standards, resulting in a new set of revised English Language Arts and Mathematics Learning Standards. *Preiss Murphy* is on par with the current developments in education and is glad to announce that its upcoming titles will adopt the Next Generation Learning Standards.

Visit www.preissmurphy.com to learn more about the academic standards described here and how to participate in training sessions and workshops to apply standards to your teaching methods.

Approaches in Learning the English Language

1. Total Physical Response (TPR): Here is a basic method for using Total Physical Response in the classroom:

- Speak and demonstrate the action (e.g., "I'm brushing my teeth").
- call on the students to repeat the action
- repeat once more
- write the verb/phrase on the board
- repeat with other verbs and check students' retention regularly.

2. Content and Language Integrated Learning (CLIL): is a dual-focused educational approach in which an additional language is used to teach both content and language. Content and Language Integrated Learning (CLIL) is an approach where students learn a subject and a second language at the same time. CLIL courses' success is determined when both the subject matter and language is learned.

3. Social and Emotional Learning (SEL): SEL is the process of providing all children and adolescents with the opportunities to learn, acquire and practice the social-emotional competences needed to succeed in life. Core competencies are used to measure students' learning and skills in this area.

Student's Book

Stellar English Student's Book provides dialogues, vocabulary, texts, songs, and diverse practice activities to develop students' knowledge and comprehension of English. Lessons are built upon real-life topics that are relevant and interesting for students at each level. Ample opportunities for listening, speaking, reading, and writing activities provide students with the practice necessary to develop confidence and academic success in the English language. Unit reviews help students to reinforce and assess what they have learned. Additionally, individual, pair, and group work allows students to experience multiple ways to engage in language learning.

Students engage with colorful illustrations, vocabulary in context, and active listening and reading exercises.

Teacher's Book

Stellar English Teacher's Book is the perfect companion to the Student's Book and Workbook, thoroughly supporting teachers in delivering a successful lesson with detailed instructions, a breakdown of each unit's exercises, and Student's Book answer key. **Stellar English** encourages teachers to assess students' prior knowledge before introducing each concept, allowing for proper pacing and delivery of each lesson. With supplemental exercises and activities, **Stellar English** Teacher's Book provides additional opportunities for the teacher to encourage students to practice the English language.

Count on our guidance to help you succeed with the Common Core State Standards.

The Common Core Standards provide a well-structured plan for Kindergarten through 12th grade in English Language Arts/Literacy and Math. These standards were developed through extensive research and evidence to create a modern and effective approach to teaching and learning. They define grade-specific goals to guide the educational development of students helping them succeed in their academic careers and beyond.

Without a doubt, improving education through the Common Core requires a committed investment not only in curriculum and technologies, but also in professional development and teacher training. The best books and resources in the world will not make an impact unless educators feel comfortable using them and ensure that they connect with and blend into their particular style of teaching. Our experienced curriculum teams have developed materials which helps students rise to the challenge of the Common Core Standards. Our books ensure strong alignment with the Common Core State Standards, as well as curriculum guides and support materials.

The **Tiny Tots** series introduces and reviews numbers so students will learn to count, say and write the numbers, and represent quantity through developing children's numeracy skills.

Units also include chants, rhymes, and songs. These elements play a valuable role in laying the foundation for reading readiness. These activities help build vocabulary and develop sound discrimination. A CD is included so the students and teacher can listen repeatedly. These skills are crucial for developing English fluency.

English and Me

The **English and Me** phonics series is a systematic and progressive literacy program dedicated to teaching foundational phonics and literacy to students aged 3 to 6 years in Pre-Kindergarten, Kindergarten 1, and Kindergarten 2. The curriculum incorporates evidence-based best teaching practices for early literacy and is rigorously aligned with the three main existing standards: Common Core, ILA, and the Science of Reading standards.

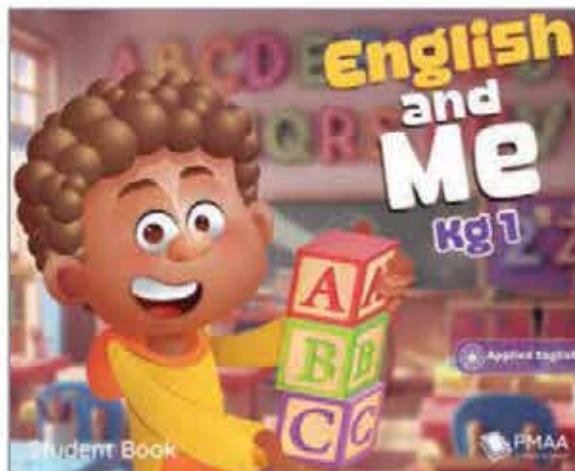

Student Book

The series utilizes a systematic and explicit phonics approach that builds early decoding and encoding skills through structured instruction and multi-sensory practice.

Pre-KG Focus (Ages 4-5): Concentrates on letter-sound correspondence for all uppercase and lowercase letters, phonological awareness (rhyming, alliteration), and initial high-frequency words ('Super Words!').

KG1 Focus (Ages 5-6): Systematically introduces beginning and ending consonant blends and digraphs (e.g., bl, sh, ch). High-frequency words are introduced incrementally as 'Power Words!' to support sentence fluency.

KG2 Focus (Ages 6-7): Progresses to long vowels with silent e and long vowel pairs (e.g., a_e, ai, ee, oa). Students expand their sight word vocabulary with 'Champion Words!'

- Des supports audio
- Des cartes lexicales (à venir)

Le support de l'enseignant

Pour donner l'envie aux étudiants d'apprendre le français et les mobiliser de travailler ensemble, **Le Lapin ABC !** leur invite à pénétrer à 13 unités, base aux découvertes fascinantes et aux activités motivées en communication. Chaque unité présente les lettres différentes, et vocabulaire base aux ces lettres pour attirer leurs attentions à l'alphabet.

Le Lapin ABC ! offre les nombreuses scènes en couleurs qui aident à mettre en évidence ce qui va arriver dans l'exercice. C'est la première étape pour développer la pensée critique chez les étudiants.

Chaque unité a des activités de communication qui aident les enfants à développer leur pensée critique, leurs interactions sociales, et leur confiance en utilisant le langage. Ils aident à transmettre l'information, à comprendre les autres, à s'exprimer, à poser et à répondre aux questions.

Tel exercice enseigne comment différencier l'information mauvaise de l'information bonne.

Les exercices de la coloration aident les élèves à développer la reconnaissance de la couleur et de la forme. Ils développent la motricité fine, la concentration et le centre d'attention des élèves.

Les illustrations ont aussi un indice visuel qui permet aux élèves de prédire ce que se passera dans la tâche d'écoute.

Primaire

Petit Prix

Petit Prix est la méthode qui s'adresse aux enfants débutant dans leur apprentissage du français. Cette méthode a pour but d'amener les élèves au niveau A1 du Cadre européen.

Petit Prix s'inscrit dans une démarche actionnelle, créative et ludique pour donner à l'élève le plaisir et le goût d'apprendre, de communiquer et de grandir en français. La méthode de ce livre s'adapte aux différentes situations et à la diversité des élèves.

Le matériel

Le livre de l'élève

Il se compose de quatre unités. Les contenus sont abordés à travers des activités variées, une large priorité est accordée à l'oral. Chaque leçon a le titre de communication travaillé. Chaque leçon commence par une écoute active pour introduire le vocabulaire, puis on a plusieurs activités de compréhension et production orale, des chansons et de préparation au DELF Prim. Ce

livre compose d'une double page de jeu ou d'histoire pour réemployer les connaissances acquises dans l'unité. Il propose des projets pour s'entraîner, une page culturelle pour ouvrir les enfants le monde entier.

Le cahier d'activités

Ce livre propose quatre double-pages avec les exercices bien systématiser. Il aussi comporte les activités d'entraînement au DELF Prim.

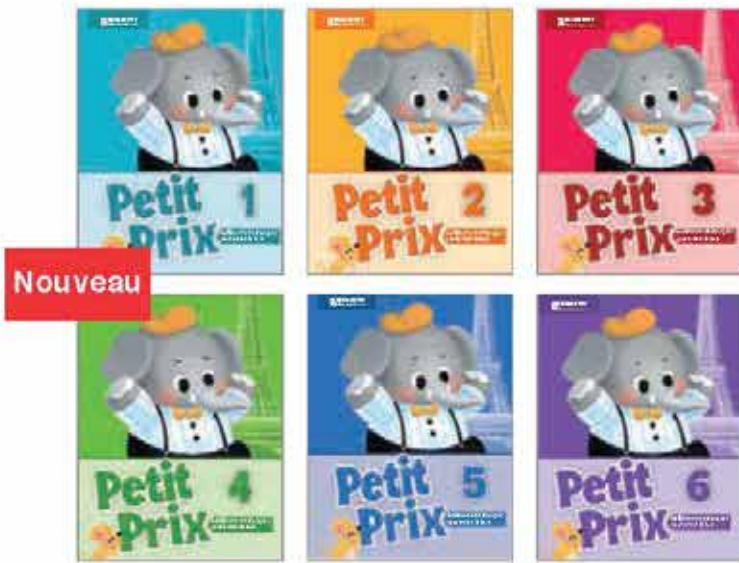

Le guide pédagogique

Il contient les objectifs et le matériel nécessaire de chaque activité. Aussi, on propose le scénario détaillé de chaque et dynamiser la pratique de class.

Les affiches

Oui Oui

Oui Oui est une méthode d'enseignement du français et de la lecture en français, destinée aux enfants de 5 à 11/12 ans.

Oui Oui s'adresse directement aux enfants en traitant de leurs préoccupations quotidiennes : l'école, la maison, les amis. Cette méthode fait partie du nouveau cursus pour l'enseignement de base du français.

Oui Oui se compose de sept niveaux. C'est une méthode d'apprentissage complète qui offre à l'élève la possibilité de communiquer rapidement en français. À la fin de ce livre, l'enfant doit écrire toutes les lettres de l'alphabet et savoir lire l'ensemble des mots et des textes présentés dans ce livre. **Oui Oui** guide l'enseignant aborde diverses techniques d'apprentissage et développe des méthodes et des stratégies pour faciliter l'enseignement du français. Il comprend une variété des stratégies, des méthodes d'apprentissage et les activités intéressantes qui abordent la lecture, la connaissance de l'alphabet, des lettres et des sons. Ce guide propose les solutions et les activités éducatives au sein de la classe aidant à l'amélioration du niveau de la langue, à la motricité fine et à la formation du lettre/mot.

Le support de l'enseignant

Ce livre a une QR code qui aidera les élèves pratiquer à la maison du matériel appris dans la salle de la classe. Ils doivent le scannez et puis, ils ont accès aux activités nombreuses pour réviser et améliorer leurs connaissances.

Le livre de l'élève

- Adopter un style d'apprentissage ludique
- Faire le point sur les valeurs des lettres
- Comprendre des fiches pour les élèves afin de suivre leur progrès éducatif
- Permettre à l'élève de distinguer les lettres et les sons
- composant les mots. Ainsi, d'une leçon à l'autre, il reconnaîtra de plus en plus de lettres et des sons et finira par lire des mots entiers
- Entrainer les élèves à écouter, à répéter et à comprendre
- Encourager les élèves à faire régulièrement le point sur leurs connaissances et à s'auto-évaluer
- Présenter les concepts importants de manière progressive afin de perfectionner l'apprentissage
- Respecter les normes nationales et internationales (FLE)

Les mots du vocabulaire sont choisis de la manière de représenter la lettre de la leçon. Le vocabulaire donne aux étudiants les mots pertinents qu'ils peuvent utiliser dans leur vie quotidienne.

Toutes les leçons ont une pratique et répétition d'information connue dans le cahier d'activités. Dans cet exercice les élèves s'entraînent à identifier et à écrire le lettre.

Les activités à réaliser et les dessins pour mieux comprendre les mots.

Grand Prix

Grand Prix couvre trois niveaux A1, A2 et B1 du CEFR et prépare au DELF A1, A2 et B1.

Pour apprendre n'importe quelle langue, la notion du groupe est très importante : parce qu'une langue sert à communiquer avec les autres et parce que les étudiants l'apprennent dans une classe, parlant avec l'un de l'autre.

Grand Prix propose d'apprendre le français dans une approche collaborative et une perspective actuelle. La collection s'adapte aux différents rythmes d'apprentissage avec une structure claire et facile à utiliser.

Grand Prix propose un univers proche des ados : des thématiques actuelles traitées au travers d'un réseau de « vrais » ados.

Deutsch lernen

Richtig

Richtig ist eine zweistufige Serie, die Schüler dazu ermutigt, ihre Deutschkenntnisse durch altersgerechte Aktivitäten zu üben und zu festigen. **Start Right** richtet sich speziell an DaF-Schüler (Deutsch als Fremdsprache).

Komponenten

- Kursbuch
- Arbeitsbuch
- Klassen-Audio-CD
- Lehrerhandbuch
- Lehrer-Materialienpaket

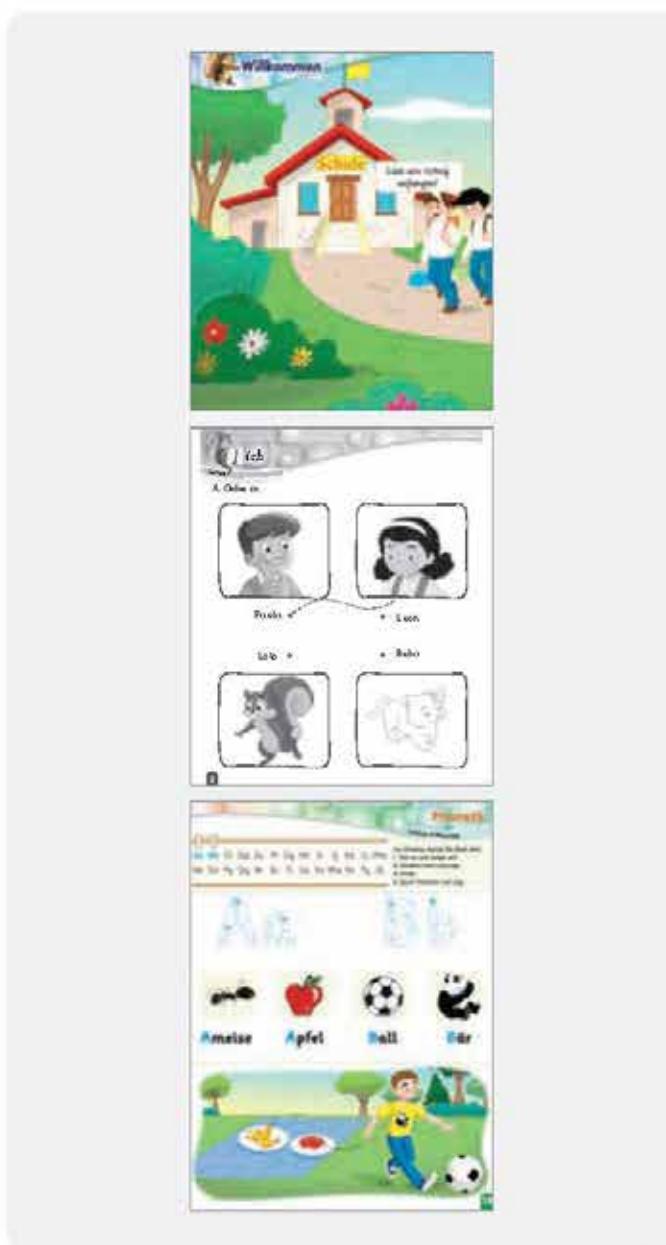

Kursbuch

Das Kursbuch enthält wunderbare farbige Illustrationen in einem einfachen und ansprechenden Format. Die Schüler werden durch die faszinierenden Bilder in das Buch hineingezogen, was ihre Aufmerksamkeit weckt und ihr Interesse durch das gesamte Buch hindurch aufrechterhält.

Richtig kombiniert aktives Deutschlernen mit einer Vielzahl lebendiger, themenbasierter Einheiten. Die Schüler können sich mit den im Buch behandelten Themen und Situationen identifizieren, was zu einem größeren Spracherwerb und einer besseren Beibehaltung der Sprache führt. Die Schüler verbessern Ihre Sprech-, Hör-, Lese- und Schreibfähigkeiten, während sie gleichzeitig Spaß haben.

Lehrenunterstützung

Lehrer werden feststellen, dass **Richtig** den Schülern einen soliden Einstieg in eine Fülle von Vokabeln und einfachen Grammatikstrukturen bietet und ihnen von Anfang an dabei hilft, zu kommunizieren. **Richtig** integriert Techniken aus bewährten und erfolgreichen Methoden zum Lehren der deutschen Sprache für Kinder. Die Schüler werden angeleitet, den Spracherwerb durch funktionale, kommunikative, strukturelle und audio-linguale Methoden anzugehen, sodass unterschiedliche Lernstile berücksichtigt werden.

Spitzen

SPITZEN!

Niveau: Nullanfänger (Pre-A1) | Grundstufe (A2.1)

Zwei sehr unterschiedliche Zwillinge begleiten die Lernenden in Spitzen! auf den ersten Schritten durch die deutsche Sprache und Kultur.

Dieses interaktive und kindgerechte Lehrwerk in vier Bänden ist für Kinder ab 6 Jahren konzipiert und macht den ersten Kontakt mit der deutschen Sprache einfach und unterhaltsam. Das Lehrwerk ist für die Grundschule in 4 Bänden auf den Niveaus Pre-A1 bis A2.1 verfügbar.

Das Spiralcurriculum sorgt für eine sanfte Progression, während die Methode der multiplen Intelligenzen für einen inklusiven Unterricht eingesetzt wird. Die Kinder können die Sprache von Beginn an in realen Lebens- und Kommunikationssituationen erleben und anwenden. Die Lernenden haben die Möglichkeit sowohl mit der gedruckten als auch mit der digitalen Version des Lehrwerks zu arbeiten.

Kernmerkmale

Spiralcurriculum Die eingeführten Inhalte werden kontinuierlich wiederholt und erweitert, was für eine sanfte Progression und eine kontinuierliche Festigung des Erlernten sorgt.

Multiple Intelligenzen / Inklusion Inhalte aus verschiedenen Fachern (CLIL) kommen den unterschiedlichen Talenten der Lernenden entgegen und schaffen eine inklusive Lernatmosphäre; ideal für Klassen mit heterogenem Lernniveau.

Agenda 2030 und Weltburgerkunde Aktivitäten und kleine Projekte sensibilisieren die Lernenden von Anfang an für einen respektvollen Umgang mit der Natur und anderen Kulturen.
